Muet: Band 3

REWARD AND RECOGNITIONS

- Adobe Certified Professional (Photoshop) September 2023
- Competition Innovation Workshop II (1st) January 2023

PROJECT

KiKo: The Interactive Website Podcasting For Higher Educational

2023

Personal Project

- The Kiko podcast is an educational online podcast.
- This podcast will compile a number of things that students wish to learn onto one webpage.
- This initiative aspires to serve as one of the venues via which students may study.

The skill that needs for this project is HTML 5, CSS, Javascript, and Bootstrap 5.

"Takkan Hilang"-Short Film

2023

Director

- Takkan Hilang will introduce a gentleman doctor named Hairul, the sole child of his parents who has worked as a doctor overseas for many years and has only returned to Malaysia once to meet his parents.
- This short video depicts Hairul's unfavorable impression of working for Malaysia and choosing to work overseas, which is based on the notion of Brain Drain, which refers to people who departed from a specific nation.

The skill that needs for this short film is critical thinking, project management using software adobe photoshop, illustrator, premier pro, and after effect.

MOZAC Damage Complaint System

2022

- The MOZAC Damage Complaint System was designed to make it easier for employees and students to inform management of any facility damage.
- Using this approach, MOZAC staff and students may report facility damage more promptly and efficiently.
- Any reported damage to the school's facilities will be reported to the school's administration so that immediate action may be taken.

The skill that needs for this full-stack development project is HTML 5, CSS, Javascript, Mysql, and PHP.

EXTRACURRICULAR INVOLMENT

Expo Photography "Fotografia"
2022

May

Committee member

Manage the supply of food for participants participating in the "Fotografia" photographic expo.
